Week 18	8/28	9/3				
2021-08-28	21:00	0:00	3			App integration: connect with 1wallet via Redirect
2021-08-29	1:00	3:00	2			(Continued)
2021-08-29	17:00	22:00	5			App integration: request payment; modularized and prefillable Send module; Working end-to-end with notes; Review Sushiswap initial UI implementation from haolin (#99)
2021-08-30	4:00	5:00	1			App integration: live trial, testing, discussions, and documentation
2021-08-30	20:00	22:00	2			App integration: documentation and initial release; Fix bugs related to selecting payment address for a payment request that does not specify address
2021-08-31	14:00	15:00	1			Release v0.9.2; Multi-network support for redirect integration; Documentation
2021-08-31	17:00	0:00	7			EIP-1271 implementation on smart contract; SignatureManager library for smart contract with lookup, list, revoke, revoke all, conditional revoke (by expiry time); Fix bugs with reclaim domain operation; More code review on Sushiswap UI and functionalities
						(Continued) more signature management helper methods, bug fixes, and end- to-end testing; Creating CommitManager smart contract library to manage commit related operations; Refactoring core contract; Research on Gnosis
2021-09-01	0:00	4:00	4			Safe
2021-09-01	9:00	10:00	1			Sync with daVinci; Discussions on integration
2021-09-01	17:00	18:00	1			Analysis of daVinci code and preparation for integration; Relayer update for new contract library
2021-09-01	21:00	0:00	3	30		Ability to call another contract and pay via a function, based on pre-encoded parameters and signatures; Core library implementations and helpers; More research on Gnosis Safe
2021-09-02	0:00	6:30	6.5			(Continued) App integration: call contract; Revise and improve other app integartions; Analyze address-input issue (#105), lack of notification for saving address (#101); Review fix (#106); Analyze QR code scanning sensitivity issue (#102); Review attempted fix (#103) and experiment with alternative QR code libraries; Refine QR code parsing process and make scanning recommendations;
2021-09-02	20:00	0:00	4			Relax rate limiter; Test contracts for testing call operation; Fix issues with Call libraries and integration; Revise post-onboarding messaging; Dev routes for Call in secret url; Core commit-reveal flow: allow functional parameters; More utilities for byte manipulations and more intelligent reveal api;
2021-09-03	1:00	6:00	5			(Continued) App integration: request signature; optional compliance to ethMessage standard; Secret dev route for Sign using a particular wallet; Derive and implement common components for app integrations
0004 00 00	00.00	20.00	0.5		40	Release v0.10.1; Release notes; Code review on v10 changes and revise;
2021-09-03	20:30	23:00	2.5		18	Wiki - app integration - call and sign
Week 19	9/4	9/10				(O-ational) Orabinary and and analysis on the atota of Hamman
2021-09-04	0:00	4:00	4			(Continued) Sushiswap research and analysis on the state of Harmony Sushiswap; Scripts for crawling available pools and tokens actively from Harmony Sushiswap; Sushiswap contract compilation, verification, and experimentations on Harmony
2021-09-05	13:00	17:00	4			Research on ImmutableX; Sushiswap ABI and integrations; Sushiswap contract compilation, verification, and experimentations on Harmony; Review of haolin's work on mobile optimizations (#117)
2021-09-05	23:00	0:00	1			(Continued) bug fixes of scripts; Substantial revision of Sushiswap frontend based on logics presented in smart contract; APIs
2021-09-06	0:00	4:00	4			(Continued)
2021-09-06	16:00	20:30	4.5			Sort Sushiswap tokens by custom priorities; APIs for retrieving tokens and pool states and quotes; Proper sorting, filtering, and intelligent setup of token pairs in frontend states based on selected tokens and availability of liquidity
2021-09-07	1:00	7:00	6			End-to-end working version of Swap (ONE to token); Proper tracking of newly swapped token and owned tokens available for swapping; Proper dynamic quotation for swappable amount and expected amount based on selections
2021-09-07	16:00	17:30	1.5			Review and test token swapping approval-confirm logic (#121) and advanced settings; Various bug fixes and improvments
						Proper implementation of reserve verification and liquidity check for both ONE- >token and token->ONE swaps; Various API and library improvement on balance parsing and formatting; Fix various issues of incorrect API usage
2021-09-08	0:00	0:00 4:30	4.5	30		related to swap;  End to end working version of Swap (token to ONE, ONE->WONE, and WONE->ONE); Release version v0.10.2 and Swap functionality on dev mode; Fix various bugs related to decimal, swap allowance, invocation of call data encoding, and others; Documentation of non-urgent issues (#122); Further review of mobile optimization (#117)
2021-09-08	14:00	14:30	0.5			Fix critical display issues after mobile optimization; Discuss 1wallet project and work plan with potential collaborators
2021-09-09	0:00	1:00	1			Fix various unresolved, obscure responsiveness issues after #117; Complete review of #117 (haolin's work on mobile optimization)
						Review of NFT responsiveness issues (#124, haolin); Backward compatibility
2021-09-09	15:30	16:00	0.5			implementation for restoring old wallets (pre version 7)

2021-09-09	17:30	20:00	2.5			Release of v0.10.3; Clickable QR code during onboarding; Make QR code unregonizable for all authenticators other than Google's (#109, #125, #50). Add special support for daVince metadata so files without suffix can be displayed correctly; Added special mobile view for onboarding; Added OSspecific Google Authenticator links;
2021-09-10	2:00	4:00	2			Review and comment on Shashank's work-in-progress end-to-end security analysis and report
2021-09-10	8:30	9:30	1		12	Sync with Shashank and discuss security report
			Regular	120		
			Overtime		56	Four deadlines: Hackathon, App integration, Sushiswap, Offline Event
